

# MELEX ELECTROVEHICLES

*The African pathway "fit for application" to a cost-effective zero emission transport future*

Established in 1995, Melex Golf Cars Pty Ltd is the leading exclusively electric vehicle (EV) company in Sub-Saharan Africa.

Melex were the first to market EV's and as a registered Manufacturer Importer Builder (MIB) have developed and homologated the first road legal commercial EV in South Africa. Melex are headquartered in Cape Town, the "Greenest" city in Africa.

## **VISION**

The Melex Electrovehicles "Pathway to Zero" strategy offers cost-effective Zero emission transport and Utility solutions "fit for application" to Africa.

The accelerating worldwide adoption of clean technology is improving functionality, reducing prices and proving reliability.

Melex believe the time is now right for the mass adoption of clean transport technology in Africa.

## **MARKETS**

Over the last 20 years Melex have built significant relationships with over 2000 customers and proven the reduction in emissions and cost of ownership of using EV's compared to ICE (Internal Combustion Engine) vehicles.

Melex vehicles are used in the utility, hospitality, shuttling, security, agricultural, commercial and commuting markets.

Melex have built strategic relationships throughout Africa with national airports, universities, hospitals, farms, resorts and hotel chains, and with governments energy and defense departments.

The big growth areas Melex see in the next 5 years are in the road legal sector and the high usage passenger shuttle, commercial vehicle & utility markets.

## **PRODUCTS**

Melex Electrovehicles offer a wide range of EV's on a sale or rental basis. The range comprises of off-road farm utilities, shuttle buses, golf carts, road legal shuttle and utility vehicles, and light industrial utilities.

Melex offers Hybrid, as well as on and off board solar charging infrastructure to reduce upstream charging emissions and increase operational time.

## **SERVICE AND SUPPORT**

Melex have a regional dealer network for sales, service and spares for new, refurbished and used EV vehicles.

Melex are able to provide consulting in fleet sustainability, "fit for application", Cost of Ownership models and carbon calculations, with experience of island and mainland deployments.

## **QUALITY**

Melex have been developing solid long-term relationships with their customers and this is borne out with the level of repeat business they continue to receive.

Melex are committed to continual improvement and exceeding our customer expectations.

## **FUTURE**

Melex Electrovehicles products are in-line with the many governments' strategy to go "Zero emission" and are achieving significant market adoption.

This market is the perfect place to establish a fleet of EV's leveraging the Melex EV Tech solutions.

## **SUMMARY**

Melex are at the forefront of EV adoption and application in sub-Saharan Africa and are leading the African drive to cost effective "fit for application" zero emission transport.
